Job Description for Intermediate Electrical Engineer (MEP)

Main Details

Name:

Job title: Intermediate Electrical Engineer

Department/Discipline: Building Services (MEP)

Place of work: 5 The Triangle, Wildwood Drive, Worcester WR5 2QX

Line Manager: MEP Technical Director

Principle Role

To provide design proposals, professional expertise and support, working in direct collaboration with the project design teams in competently implementing the requirements of individual project briefs and to perform the role of lead designer (where discipline applicable to role as lead), where so named in the company project quality plans (PQP).

To contribute to the success of the company.

Project Responsibilities

To be able to lead a project from inception through to the construction and handover phase, including preparing drawings, BIM models, specifications, tender and construction information, monitoring works in production and dealing with clients, contractors, sub-contractors and suppliers.

Work as an integral collaborative member of a project team faithfully carrying out the activities that would be expected of a competent qualified design professional. Such duties include, but will not be limited to:

- Defining, recording and maintaining by appropriate means project brief information from the client and/or other relevant parties to determine design input information.
- Preparing feasibility studies, building services strategy documents, fee proposals, and briefing documents, as necessary.
- The preparation of tender information to include services layouts, schematics and accompanying documents i.e., specifications; generally using BIM models where practical.
- Preparing detailed designs and/or construction details for whole (traditional) projects, buildings, elements or components, including associated specifications, schedules, calculations and the like; generally using BIM models where practical.
- Clearly communicating by appropriate means proposed solutions to all design team members and client team.
- Attending meetings, taking, preparing, checking, and issuing minutes where required.
- Acting as the point of contact for own discipline with other Lead Designers and the like.
- Preparing and coordinating discipline work stage programs for the design process.

Job Description for Intermediate Electrical Engineer (MEP)

- Coordinating the design of constructional elements including work by other disciplines and consultants, specialists, or suppliers.
- Ensuring the form and content of design outputs, their interfaces and verification procedures are in accordance with the requirements of the PQP.
- Contribute to the Consultant Appointment process to identify necessary fees.
- Monitor and report on progress of own discipline to the DTL ensuring that resource utilisation for own discipline remains within the budget agreed; and
- Report to the DTL any disruptions to the resource utilisation caused by reasons beyond own control and otherwise explain any discrepancies in anticipated profitability as soon as such discrepancies become apparent.

Learning Commitment

Disseminate 'new' information to others.

Ensure your own continued professional development by reading appropriate journals and by utilising the HIS information website to which the company subscribes.

Take a wider interest in the construction process and add value wherever possible.

Management Responsibilities

Contribute to MEP team planning and deployment.

Mentor junior members of the team.

Provide support and advice to enable the professional development of colleagues within the building services team and the company.

Where required manage and oversee project resources, including MEP contract resource (if necessary) for delivery of projects.

Ensure ONE maintains a positive profile and is proactive and consistent in its dealings with clients and contacts.

Work with the design teams on individual projects ensuring that solutions are identified which meet and where appropriate surpass the client brief/expectations.

Business Development

Work with new and existing clients to develop a firm foundation for long term partnerships and to ensure that ONE is their first point of call for all their design, building services solutions.

Work with the design team on individual projects in a variety of sectors ensuring that solutions are identified which meet and surpass the client brief.

Identify new business opportunities and assist in the production of bid documentation.

Job Description for Intermediate Electrical Engineer (MEP)

Core Activities

Ensure the culture of the team is one of learning and creativity with people being willing and able to offer highly creative and innovative solutions.

Create an environment within the team where people enjoy the work they do and are able to create and exploit opportunities for self-development for their own and ONE's benefit.

Fully implement and/or cooperate in the implementation of the Company's Health and Safety policies & Quality Management Systems provided upon employment and as updated thereafter.

Contribute to the wellbeing of the Company by being always proactive in its development and improvement.

Carry out any other duty reasonably requested by the Directors.

Key Activities and Responsibilities

Refer to the Person Specification for detailed technical skills and experience required for this position.

Review of Job Description

This job description outlines the current duties and responsibilities for this role; however, it is subject to review and amendment in the light of developing or changing services and as part of the annual Individual Performance Review.

Job Description for Intermediate Electrical Engineer (MEP)

NOTE: This description is not intended to establish a total definition of the job, but an outline of the duties.

Confirmation of Agreement

It is agreed that the duties and responsibilities identified above accurately reflect those required of the postholder.
